

TSOBJECTKEY 5 – Keymanagement always at your fingertips

With TSOBJEKTKEY 5 you can manage all your different mechanical keys in the simplest way. As a complete solution, it offers all the features that are necessary to make the management of keys simple and straightforward even for laymen. As an extension to TSKEY, the program TSOBJECTKEY offers an extension of the functionality on doors, objects, installations and buildings.

The now presented version 5 is the result of nearly 10 years of key management TSOBJECTKEY by customers. The continuous development of the basic idea of key management provides you with the basis for long-term success in key-management. Growing up on the versions

2004 and 2008, TSOBJECTKEY 5 represents the current state of software development.
